

# Cybernet iOne S20

20" All in One Touchscreen PC

## Customizable and Widescreen

The iOne S20 has a brilliant 16:9 widescreen HD display making it perfect for modern software applications. Use the desktop stand or the VESA mounting plate to install this computer nearly anywhere. A highly customizable feature set allow you to tackle nearly any business need.

## Built for Business

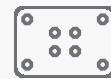

### Intel Core Processor

The Cybernet iOne S20 can be equipped with Intel's 6th or 7th generation i5 or i7 processor, integrated Intel graphics, and up to 32GB of RAM, making this a powerhouse business computer.

### Engineered for Reliability

All of our enterprise computers are constructed with industrial grade components, resulting in a less than 2% failure rate, much better than a standard commercial grade PC.

### VESA Compatible

Use a standard desktop stand or take advantage of built in VESA 75/100 compatibility to mount to a wall, cart or virtually anywhere else.

## Disaster Ready

Hardware can be replaced, data typically can't be. That is why the iOne S20 has been engineered to protect your data. Whether it be a temporary power outage, or a natural disaster, the iOne S20 has an optional UPS backup battery that provides 5 hours of uptime. An IP65 rating protects against water and dust ingress. This unit can even be equipped with dual hard drive support configured in a RAID setup to provide seamless protection from data loss.

## Incredible Versatility

The iOne S20 is an incredibly versatile business machine, with multiple ports and expansion slots, plus, a number of optional features that can be customized to any business need. Add an RFID or Smart Card reader for added security. Optional PCAP touch glass can be included for expanded functionality. Whatever your need the iOne S20 can handle it.
